

Shamiso Vushe

SOFTWARE DEVELOPER

Namibia, Windhoek | 081 402 4213 | shamirav2005@gmail.com | Portfolio Website: shamisovushe.netlify.app

Profile Summary

Passionate and dedicated Software development intern candidate with experience building backend services and interactive frontend interfaces for web, desktop, mobile applications. Possesses hands-on experience in both automated and manual software testing.

Work Experience

MTC Maris | Software development Intern

September to December 2025

- Worked in an agile scrum environment where I attended and contributed to daily standups
- Designed and built a content management system for an existing website, improving content updates and maintainability
- Implemented geolocation features including map display and Street View, and built a geolocation agent to identify the nearest outlets using the Google Maps API
- Integrated web analytics and dashboards using Google Analytics, Looker Studio, and Google Data APIs to support data-driven decisions
- Assisted in compiling documentation for various software features
- Conducted software testing to identify bugs and security vulnerabilities
